

Global Technology & Language Integration Report

Namaste World - Hindi and English Multi-Language Integration

SECTION 1: CORE ARCHITECTURE

Our distributed document processing engine is engineered to run entirely in modern web browsers without external cloud dependencies or servers. This guarantees complete data confidentiality and zero ongoing server operational expenses.

SECTION 2: FORMAT FIDELITY

Converting between fixed-layout vector PDFs and portable OpenXML is a non-trivial task that requires spatial layout analysis, table grid detection, and precise font metric matching algorithms.

Module	Target Format	Fidelity Score
Vector Layout Engine	OpenXML .docx	99.4%
Table Grid Reconstruction	DOCX Table API	98.8%
Font & Style Preserver	Standard Fonts	99.1%

APPENDIX A: REGIONAL PERFORMANCE MATRIX (LANDSCAPE)

Region	Total Documents Processed	Conversion Success Rate	Avg Latency (ms)
North America (US-East)	1,420,000	99.98%	42 ms
Europe (EU-Central)	980,000	99.95%	38 ms
Asia-Pacific (APAC-South)	1,850,000	99.99%	45 ms
